P.E.S.T. Relief International Partners with Perfection Pest Control of Union, Kentucky

Tim Leatherman, President of Perfection Pest Control Inc, spends his days servicing Indiana, Kentucky, and Ohio with pest control services and a desire to impact his community. A 39-year veteran in pest control, it was at Reset Ministries where he partnered with P.E.S.T. Relief International to host his first REST Initiative.

Through REST, Tim provided clean bedding and pest control services for sanitary living conditions, so that the residents of Reset Ministries can continue to get the help and care they need in a safe environment.

Reset Ministries is a Christ-centered, voluntary program for men and women in the Greater Cincinnati area that desire to radically change their lives. The program consists of five key components that are essential to helping men and women break the destructive patterns in their lives that lead to addictions, lost opportunities, and (re-)incarceration. Those five key components are dignified housing, employment opportunities, growth opportunities, hope for the future, and Biblical truth.

To volunteer his time and resources, Tim installed bed bug certified mattress covers along with Scentsi Volcanos as part of his bed bug prevention treatment. Not only did he perform pest control services, but he also provided a healthier sleeping environment, protecting the residents from dust mite allergens and bacteria that are often contained in mattresses used in a transitional environment.

Through his efforts, Tim was able to support Reset Ministries in giving hope, restoring dignity and enabling life transformation.

Special thanks to Perfection Pest Control, Mattress Safe, Inc. and Bed Bug Central for the donation of services and products to make this project a success
